ANNOUNCEMENT

Dummer Academy is situated in the town of Newbury, Essex County, in one of the healthful and beautiful country districts of the famous North Shore of Massachusetts. The location is especially well suited to a boarding school. There are no public attractions near. The villages of Byfield and Ipswich are three and six miles distant respectively, and the city of Newburyport is four miles away. These are all stations on the Boston & Maine Railroad; they are connected with the Academy by an electric railway.

Dummer Academy offers all the advantages of a preparatory school. Its work is thorough, systematic and progressive. Although its chief object is to prepare pupils for entrance to colleges and technical schools, it also offers an exceptionally complete course for those who have no further schooling in view. Boys of all ages are received and particular attention is paid to the arrangement of their courses. The needs of the individual are consulted with an aim to develop the best in him. Pupils of advanced age are given every encouragement to make up work, and to complete the course in less time than the others. Graduate work may be carried on by any who desire. By pursuing one year of graduate study pupils may be prepared to enter College as Sophomores.

Dummer is primarily a home school. It has few rules, only those consistent with good discipline. Great freedom

of action is allowed. Self reliance is encouraged. Students are required to be courteous and punctual; to keep their rooms and personal appearance neat; to attend church regularly, and to write home at least once each week. They are expected to act in a gentlemanly manner at all times.

A separate home is maintained for the younger boys, under an instructor and his wife.

Daily exercise is required, as both healthful and manly. Out-of-doors sports are practised when the weather allows; on stormy days the exercise is in the gymnasium. Athletic sports of all kinds are judiciously encouraged. The Parker and Mill rivers, which enclose a part of the Academy farm, afford excellent bathing and boating. All exercise is under the direction and supervision of some member of the faculty.

At stated periods of each day the pupil studies under the supervision of an instructor. Additional hours of study are prescribed for those whose standing is low.

South Byfield is remarkably healthy. Cases of sickness have been very few. However, when occasion requires, prompt and efficient care is given. Several competent physicians and trained nurses are within easy reach. The health of each boy is cared for as carefully as are his studies. To this end regular hours for rising and retiring and for daily study and exercise are prescribed.

It is believed that ability to use correctly the English language is of primary importance. Therefore the Academy offers a course in Daily Themes which is prescribed for all pupils throughout the year. These themes must be short, and may be written upon any subject. The chief purpose is to cultivate natural and correct expression. Public declamation is required of every pupil with the object of encouraging good composition, proper bearing, clear pronunciation and

suitable expression. Special mention is made of those who excel.

In the courses of Ancient and Modern Languages, special attention is paid to the use of correct English in translations.

In the courses in Mathematics, throughout the training in the ordinary subject matter of Algebra, Geometry, and Trigonometry, pupils are taught to think for themselves, to handle actual problems, and to perform correctly the ordinary processes of Arithmetic.

Entrance examinations for Harvard College are held at the Academy in June. All pupils are urged to take the examinations for whatever college or technical school they purpose entering. However, the certificate from the Academy will admit to colleges who receive pupils without examinations.

The Dummer Forum is a debating society made up of members of the school. Its meetings occur bi-weekly. It serves to encourage public address and offers practice in parliamentary rulings.

The Dummer News is published monthly during the school year. It is purely local, confining itself to the affairs of the school, and aims to interest pupils and friends, particularly graduates who may wish to keep in touch with the Academy.

The Dummer Academy Athletic Association cares for the athletic interests of the school. It has regular sessions for business once a month.

The Quesacunquen Golf Club, founded by students and teachers, has laid out a golf course. Golf has become one of the regular sports of the school.

At regular intervals lectures of interest and value on educational subjects are given by members of the faculty.

Several public lectures are given each year under the auspices of the Academy.

From the income of the Moody Kent Fund, founded for the purpose, six gold medals are awarded for the best standing in each of the following branches:—English; Classics (Greek and Latin); Modern Languages (French and German); Mathematics; Science; History. These prizes are distributed on Commencement Day.

Applicants for admission to the Academy must be recommended by their latest instructor for scholarship and character. Applicants for the Junior Class are examined in Arithmetic, English, Grammar and Geography. Pupils will be received into the Preparatory Class without examination. Written examinations are held each month. Reports made up from the daily work and monthly examinations, together with reports of conduct, are sent to the parents or guardian of each boy.

The rate of tuition is \$500 a year; day pupils, \$75. A laboratory fee of \$5 is charged all students taking the course in Physics or in Chemistry. *All bills are invariably due at the beginning of each term.*

A deposit of \$25 is required at registration to cover incidental expenses, breakage, and the like. A careful account is kept and at the end of the year is sent with the balance, if there be any, to the parent or guardian.

Books will be provided for those who do not care to purchase their own. A moderate rental will be charged to cover the loss in wear.

Each pupil should bring three sheets for single bed, six pillow slips, six towels, six napkins, one pair blankets, one napkin ring, one clothes-bag, all carefully marked with his initials. Rubber-boots, umbrella, mackintosh and gymnasium suit should also be brought.

COURSES OF STUDY

The courses of study have been carefully arranged to meet the requirements for admission to all the leading colleges and scientific schools.

The development of the elective system in choice of studies to be presented for examination for entrance to Harvard College has rendered it advisable to extend the elective system in the secondary schools. The number of courses in English, History, and the Sciences have been increased.

In English, advance students can anticipate their college Freshman English.

In History, a course in "mediaeval and modern European History" is given. This course is conducted by lectures, recitations, conferences on outside reading, and by special reports. The opportunity is also offered to study carefully a special field of History.

The course of study is flexible, and will be changed as seems best to meet the needs of the pupils. Those who come to us particularly well prepared, should be able to take the regular courses. To meet the increased requirements for admission to the colleges and technical schools, pupils may find it helpful to spend five years upon their preparation.

The following schedule will indicate the work usually pursued in the four years courses.
